

# Green Innovation Grant Program

**Project Title:** Combined Sewer Separation & Combined Sewer Overflow Abatement

**Grant Recipient:** Village of Gouverneur

**Location:** St. Lawrence County, NY

**Green Infrastructure Practice:** Bioretention, Constructed Wetlands, Stormwater Harvesting & Reuse

**EFC Grant Amount:** \$1,995,000

**Total Project Amount:** \$2,265,140

GIGP ROUND **3**

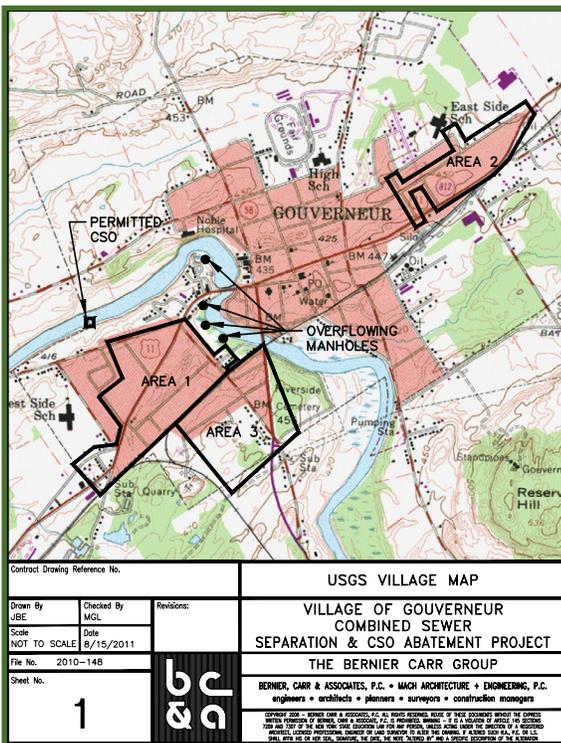

*Project in Construction 08/2013*

## Project Description:

Located between the foothills of the Adirondacks and the Thousand Islands region of the St. Lawrence River, the Village of Gouverneur will construct a variety of green practices to help reduce stormwater runoff and the occurrence of combined sewer overflows to the Oswagatchie River, which runs through the center of town and provides drinking water for its 3,949 residents.

Bioretention systems, rain gardens, constructed wetlands, rain barrels, porous concrete sidewalks and a porous asphalt residential street are among the green infrastructure technologies that will be incorporated into a larger municipal sewer separation project designed to improve the quality of stormwater entering the existing collection system in the western portion of the Village.

*An area map (left) indicates locations of overflowing manholes within the Village limits, in this municipality located along both sides of the Oswagatchie River.*
