ELIGIBLE PROJECTS/COSTS

Funding Levels:

75% of Eligible Costs up to \$35,000.00 for a new stationary unit, replacement, repair, or renovation and \$60,000.00 for a pumpout boat

Facilities and activities eligible for CVAP reimbursement include:

- Construction, replacement, repair, or renovation of **stationary and portable pumpout/dump station units**, including associated attachments, remote units, docks, and platforms.
- **Mobile pumpout vessels**, if the sole purpose is pumping out Type III marine sanitation devices.
- **Floating restrooms** in the water, not connected to land or structures connected to the land, used solely by boaters.
- **Equipment associated** with the eligible facility, such as equipment for rinsing boat holding tanks and attachments (e.g. wands) for pumping out portable toilets.
- **Activities and equipment necessary** to hold and transport marine vessel sewage to sewage treatment plants, such as holding tanks, piping, pumps, bleed-in facilities, etc.
- **Engineering costs** associated with the eligible facility, including planning, design, construction supervision and inspection.
- Other **costs directly associated** with the eligible facility, including administrative, legal and use of in-house labor.
- Facilities designed to include purposes other than those eligible under the Act shall have the costs pro-rated equitably among the various purposes at EFC's sole discretion. Assistance funds shall be used only for the part of the activity related to the CVA.

The Application shall include all information required to identify the scope of the project and any auxiliary uses or other on-site impacts to the pumpout equipment or usage.
