

CLEAN VESSEL ASSISTANCE PROGRAM

CVAP

The New York State Clean Vessel Assistance Program (CVAP) was established to protect and improve water quality in New York State's navigable waterways. Grant assistance, on a reimbursement basis, is offered for the construction, maintenance and promotion of recreational boater pumpout facilities through the following programs:

CVAP PUMPOUT PROJECT GRANTS:

Projects must be directly related to the construction, upgrade, or replacement of pumpout and dump stations, including pumpout boats and portable pumpout units which are used for the proper disposal of septic waste from recreational marine vessels. Other costs that may be considered include: floating restrooms and holding tanks, as well as costs directly associated with the project, such as labor, material, administration, engineering, legal and permit fees.

GRANT AMOUNT: 75% of eligible project costs — up to \$35,000 per project or up to \$60,000 for pumpout boats.

CVAP OPERATION AND MAINTENANCE GRANTS (O&M):

Eligible costs may include: pumpout waste disposal, pump maintenance, replacement parts, pumpout boat fuel, winterization, and attendant and administrative costs.

GRANT AMOUNT: Annually, 75% of eligible costs up to \$5,000 for pumpout boats and up to \$2,000 for all other pumpout facilities.

CVAP LOCAL INFORMATION AND EDUCATION GRANTS (I&E):

Projects designed to increase boater awareness of the benefits, use, and availability of pumpouts and dump stations to prevent contamination of New York State's waterways are eligible for I&E grants. Eligible projects may include: brochures, websites, signs, audio/visual materials, newspapers, and magazines, as well as radio and television spots. Municipal and not-for-profit organizations may apply.

GRANT AMOUNT: 75% of eligible project costs up to \$5,000 for per project.
