

2016 FINAL CWSRF INTENDED USE PLAN
Annual CWSRF Project Priority List
Project Category: A
(in descending order of score)

Project Number	Applicant Name	Project Description	Estimated Amount	Additional \$ Above ST	Notes	SPDES No*	Score
C7-6313-03-01	EAST SYRACUSE, VILLAGE OF	Planning, design and construction of inflow and infiltration corrections through addressing sanitary sewer overflows to improve the water quality in Onondaga Lake.	\$1,750,000	\$1,750,000		NY0027081	2097
C6-6031-01-01	SHERRILL, CITY OF	Planning, design, and construction of wastewater treatment plant improvements to protect water quality in the Mohawk River.	\$1,750,000	\$1,750,000		NY0022110	2066
C3-7318-04-01	DUTCHESS COUNTY WWA	Planning, design and construction for upgrades to several components of the Valley Dale WWTP including replacing the final clarifier and sand filter and installation of a new UV disinfection system. These improvements will protect the water quality of Wappingers Creek and the Hudson River.	\$1,400,000	\$100,804		NY0077593	2039
C9-6626-02-00	SILVER CREEK, VILLAGE OF	Planning, design and construction of Inflow and infiltration correction to improve water quality in Silver Creek.	\$4,700,000	\$95,852		NY0022411	1073
C4-5495-01-00	COBLESKILL, TOWN OF	Planning, design, and construction of collector sewers, pump stations and force mains in the Route 7/Howe Caverns Sewer District to maintain water quality in the groundwater.	\$3,791,000	\$2,563,750		NO SPDES	1046
C3-5323-02-75	WOODRIDGE, VILLAGE OF	Planning, design and construction of collection sewer system rehabilitation and resiliency improvements to provide storm mitigation protection and improve water quality in the Sandburg Creek.	\$792,162	\$0	E	NY0272817	1044
C3-5323-02-76	WOODRIDGE, VILLAGE OF	Planning, design and construction of collection sewer system rehabilitation and resiliency improvements to provide storm mitigation protection and improve water quality in Sandburg Creek.	\$792,162	\$0	E	NY0272817	1044
C7-6351-01-00	MEXICO, VILLAGE OF	Planning, design and construction of sewer line rehabilitation and upgrades at the sewage treatment plant to improve water quality in the Little Salmon River.	\$2,816,000	\$138,324		NY0036617	1039
C8-6432-03-00	BLOOMFIELD, VILLAGE OF	Planning, design, and construction of a project to rehabilitate a sewage treatment plant to improve the water quality in Fish Creek. The project is a comprehensive rehabilitation of aging equipment at the facility, involving repair and/or replacement of all major treatment systems and subsystems.	\$2,250,000	\$106,150		NY0024007	1039
C8-6453-05-00	AVON, VILLAGE OF	Design and construction of a project to rehabilitate a sewage treatment plant to improve the water quality of the Genesee River. Work will include digester heating improvements and new digester covers as well as thickener modifications and improvements to the influent structure.	\$3,000,000	\$84,446		NY0024449	1034
C3-7318-03-00	DUTCHESS COUNTY WWA	This project is to replace the rotating biological contactors at the Chelsea Cove WWTP. Planning, design and construction for the work will protect the water quality of Sylvan Lake and the Hudson River.	\$3,268,532	\$1,248,960		NY0032972	1034

E These projects are subject to additional Federal requirements (per the USEPA Capitalization Grant to NYS). Bolded Projects have an existing short term financing.

N Projects below subsidy line with complete FFY 2015 financing applications. These projects are eligible for subsidized financing in FFY 2016.

* SPDES permit numbers are set forth herein, where applicable, and information concerning discharge requirements is set forth in each SPDES permit.

W Projects with non-hardship and hardship components listed in Category A or B and Category D to accurately account for all funds allocated to the project.
